

## How to control the Ai2 robot from the keypad and a remote control

To control the Ai2 by the keypad, use the middle button on the keypad to select “Control” from the main menu.

Once you are in the control menu, scroll up and down with the direction buttons to view the available functions.

Press the middle button to select the function you want to start.

You will now have the option to SEND IR CODE, CANCEL or GO, press the GO button (down key) to start the function.

The Ai2 will then begin the function that was selected. You can stop the Ai2 by pressing the middle button.

To set the Ai2 up to be controlled with your home TV/DVD/VCR remote control, each Ai2 function needs to be allocated to different buttons on your remote control. To begin, use the middle button on the keypad to select control from the main menu.

**Note:** To control the Ai2 from a remote control you must have the IR Receiver module connected.

Once you are in the control menu, scroll up and down with the direction buttons to view the available functions.

Press the middle button to select the function you want to allocate to a button on your remote control. We have selected the Drive Forward function.

**Note:** Each function is allocated to a different button on your remote one at a time.

You will now have the option to SEND IR CODE, CANCEL or GO, for the Drive Forward function. At this time, you can press & release the button on your remote control that you want to operate the Drive Forward function. You will hear a confirmation beep from the sounder to indicate success.

Once you have done that, the Ai2 will now drive forward every time you press that button. Repeat these steps again for all of the functions in the Ai2.

If you have an up direction button on your remote, it makes driving your Ai2 easier if you use it for the forward function, down for the Drive Backward function and so on.

If you find that the Ai2 does not respond to your remote control, simply repeat the process with different remote control. 95% of TV/DVD/VCR remotes will be compatible with the Ai2, however there is a small quantity that will not be compatible.
